Our Story

Explosiveness, prudence and ingenuity. Using these three elements as a vehicle that characterizes its three creators, the idea of the Sky Premium Life nutritional supplements line was born. Our common belief, that the current paragon of beauty is health, took us by the hand, fueled our passion and outlined our dream.

Our team grew with dear friends and remarkable partners. Having as a background our pharmaceutical company, with facilities in Athens and Thessaloniki, we organized a product research and development department, staffed it with highly-qualified personnel, secured all production certificates, and the first luxury nutritional supplement line became a reality.

Luxury for us is the high quality of raw materials and high production standards, based on strict pharmaceutical standards and GMP protocols, as well as the scientifically based selection of the right nutrients, in the right combination and in the right content.

Luxury for us is our High End packaging, which sprang from the Art Deco of the 1920s, an era characterized by euphoria and creativity.

We were inspired by our natural environment, the Mediterranean, by the respect for people and nature, by the sun and the sea that color our whole life. We have created unique formulas with vitamins and herbs that support specific health needs, along with a wide range of basic premium quality supplements, for general well-being and vigor.

Our journey has begun. Join us.

Sky Premium Life and Doc Pharma

The Sky Premium Life line of nutritional supplements has been developed and produced by the pharmaceutical company Doc Pharma S.A., founded in 2015 and owned to the Multinational Cosmos Holdings INC. The company is active in the production, promotion and export of pharmaceutical and parapharmaceutical products, as well as high quality nutritional supplements.

The headquarters of Doc Pharma S.A. are located in Thessaloniki, while there is a branch and organized commercial department in Athens, as well as the production unit in Pallini, Attica. The production facilities are certified by the N.O.M., in compliance with the rules of Good Manufacturing Practice (cGMP) and Good Distribution Practice (cGDP). The company is also certified by TUV HELLAS for the requirements of ISO 9001: 2015.

Doc Pharma S.A., in addition to the Sky Premium Life supplement line produces, markets and distributes other supplement lines such as Doc, originator and generic drugs and parapharmaceuticals such as Diorium, Pneumo - Kast, Asto - Chol, Vivalcid, Fusibet, Melatonin-SM and others.

Quality assurance and environmental protection.

The quality control of each production is thorough to ensure that the product that will reach your hands is truly safe, of high quality and efficiency. During each new production, the products are subject to quality control at all stages of the production process. Only after the completion of all the detailed checks, the relevant certificate of analysis is issued and the batch is released.

The production site of the factory meets the highest pharmaceutical standards (pharmaceutical grade) for both the machinery and the premises, as well as for the procedures followed, while particularly significant investments have been made in the last 3 years in the laboratory and mechanical equipment.

At the same time, the luxurious dark glass bottle, which has been selected for the packaging of Sky Premium Life products, helps to protect them from sunlight while the special closure on the lid and the outer thermal adhesive tape ensure protection from moisture.

With the aim of protecting the environment, the production unit uses specialized cleaning products that are environmentally friendly, special Hepa filters air purifiers, as well as sound insulation systems in the production areas. At the same time, the packaging of Sky Premium Life products is recyclable.

With very fast growth rates, the company operates in many European countries, and has the potential for global distribution.

60 tablets
Energy,
Brain Function

L-THEANINE

170mg
60 capsules
Stress

Amino acids are building blocks of proteins and are especially important as they are involved in many functions, such as muscle growth and enzyme formation. They are divided into essential, which are obtained through diet, and non-essential, which are produced by the body. They are useful in cases of increased stress and anxiety, while they are preferred by athletes who want to develop muscle mass or increase energy. Sky Premium Life offers high quality essential amino acids.

60 tablets
Immune System,
Men's Health

Vitamins and minerals are nutrients necessary for the proper functioning of the body. They play a key role in the body's metabolic processes, while a significant deficiency can adversely affect health. As today's lifestyle does not always include a balanced diet full of vitamins and minerals, it is often helpful to take them through nutritional supplements to adequately meet the body's needs. Sky Premium Life's line of vitamins and minerals includes a full range of powerful and high-quality supplements for every nutritional need.

The beneficial properties of herbs have been recognized since ancient times as they were widely used in traditional medicine, such as in Ancient China and Ancient Greece. The Sky Premium Life line of herbs and extracts offers herbal extracts of high quality and purity, which ensure the content of beneficial active substances and cover a wide range of needs.

Very often more than one nutrient is needed to support specific needs of the body as they function complementarily to one another. Sky Premium Life's line of specialized formulas includes specially designed nutritional supplements, with carefully selected combinations of herbs, vitamins, minerals and other essential ingredients that work synergistically to provide maximum support.

Multivitamins

PREMIUM FEMALE

60 tablets
Wellness,
Energy

PREMIUM MALE

60 tablets
Wellness,
Energy

Multivitamins are one of the most popular categories of supplements as they offer a wide range of nutrients. The Sky Premium Life multivitamin line is specially designed to meet both our physical and psychological needs. With more than 20 vitamins, minerals and trace elements, it supports the whole body, strengthening the immune system, boosting energy levels and offering general well-being and good mood.

Fatty Acids

OMEGA 3-6-9

50 soft gels
Normal Heart
Function,
Vision,
Brain Function

OMEGA 3

EPA 330mg & DHA 220mg
50 soft gels
Normal Heart
Function,
Vision,
Brain Function

CLA

1200mg
60 tablets
Weight Management,
Beauty

Fatty Acids are beneficial to the body, but in some cases such as Omega 3, the body cannot synthesize them and therefore they must be taken from food. Especially Omega 3, which is naturally found in fish, has been studied for its multiple health benefits, such as its positive contribution to heart function, vision and mental function. The Sky Premium Life line offers the most essential Omega and Fatty Acid supplements in high concentrations.

Special Supplements

ALPHA LIPOIC ACID

600mg
60 capsules
Antioxidant Action

BETA GLUCANS
